

This document shows overall results and includes the number of respondents who answered each question. Most questions also show the percentages of respondents in parentheses. Respondents sometimes did not answer certain questions. Therefore, even though we received 192 responses to the survey, some findings and tables may not contain 192 responses. The percentages provided in the findings and tables, though, do reflect "valid proportions" - a percentage of all respondents who answered that particular question.

Answers to write-in questions and some of the statistical questions are not included in this initial tally but are presented in the survey report available on the Town's website and the Town Office. If you have further questions regarding this initial tally please contact the Planning and Land Use Commission Chair, Mary Beth Fitzburgh, at (435) 259-9828 or marybethf@castlevalleyutah.com
